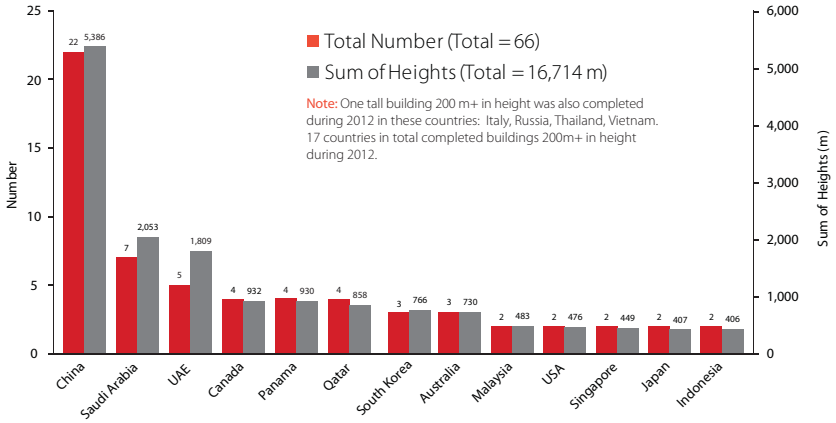
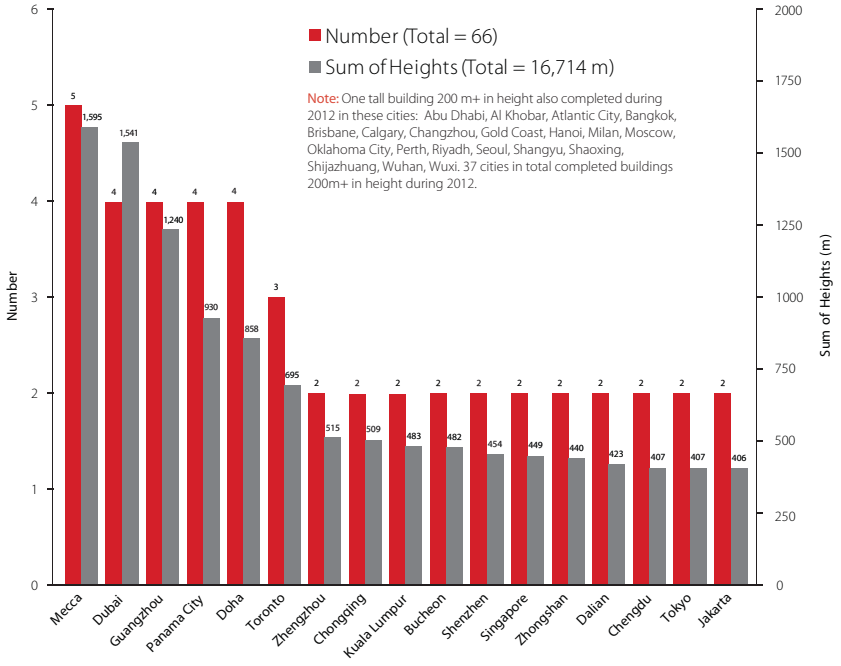
Note: Ranking is determined by feet. All heights are rounded to the nearest whole number.

2012: A Tall Building Review

Tall Buildings 200 meters or Taller Completed in 2012: by Country



Tall Buildings 200 meters or Taller Completed in 2012: by City

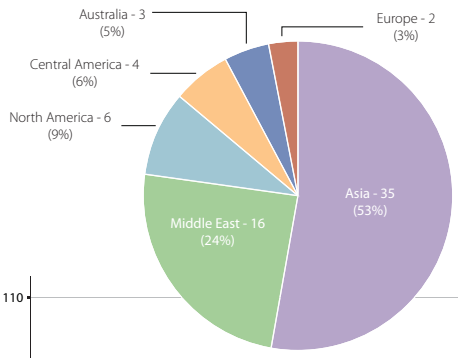


Three out of the 4 tallest buildings completed in 2012 were in **Dubai** and are now the three tallest residential buildings in the world.

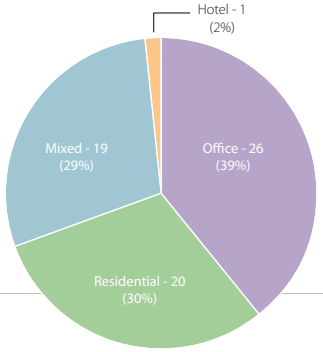
435

The total number of 200 meter or taller buildings currently **under construction**. Ninety-six of those will be supertalls and three will be megatalls.

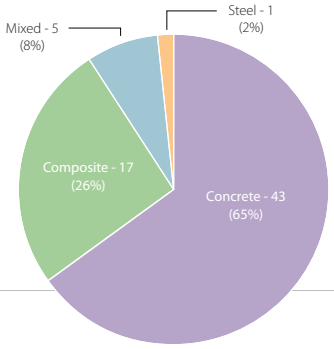
Tall Buildings 200 meters or Taller Completed in 2012: by Region



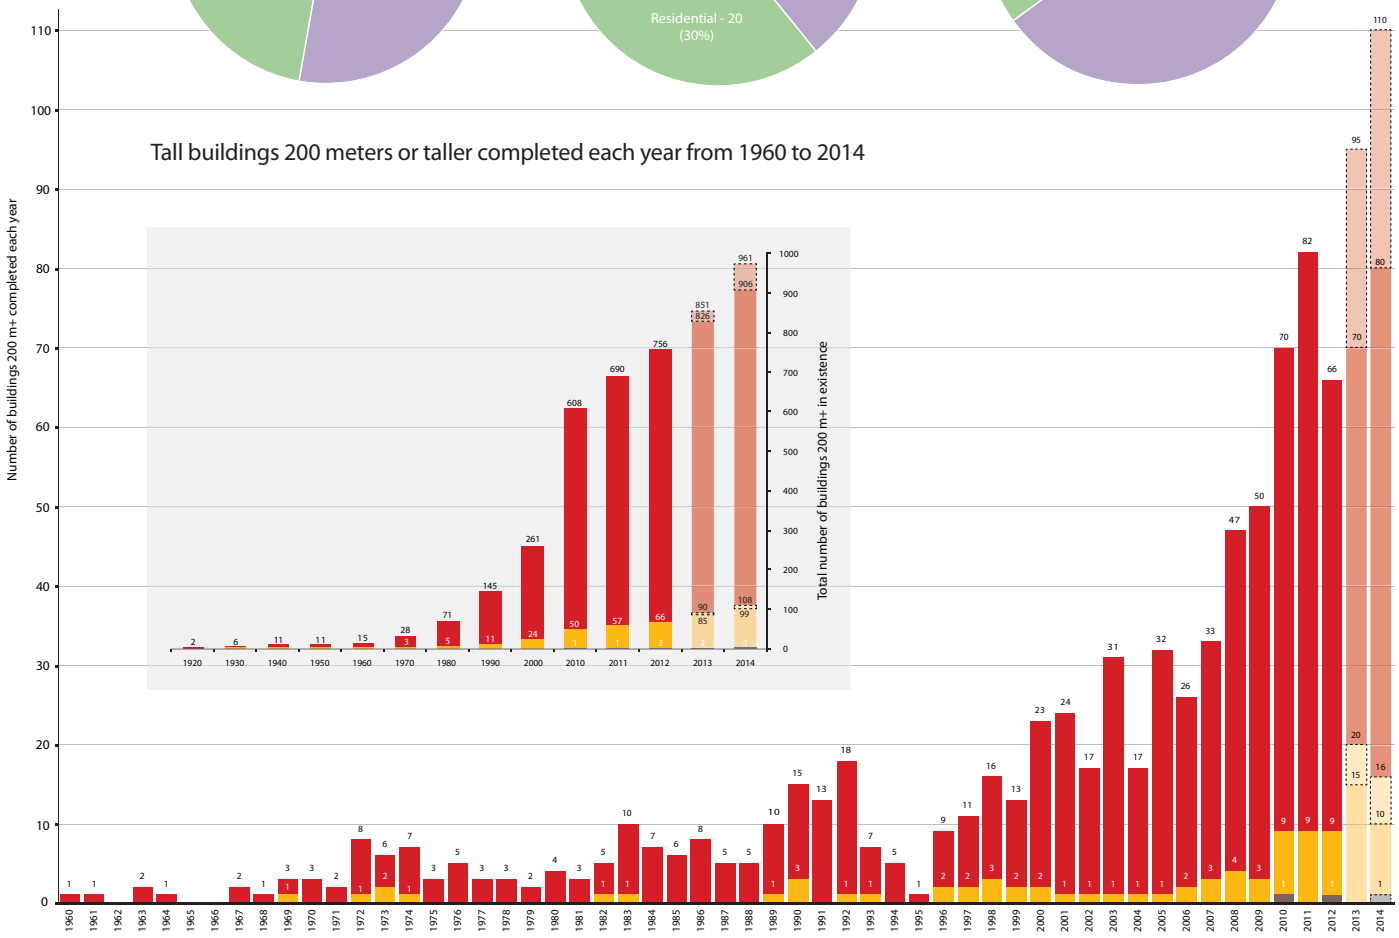
Tall Buildings 200 meters or Taller Completed in 2012: by Function



Tall Buildings 200 meters or Taller Completed in 2012: by Structural Material



Tall buildings 200 meters or taller completed each year from 1960 to 2014



Number of 200 m+ buildings

Projected number of 200 m+ buildings

Number of supertalls (300 m+)

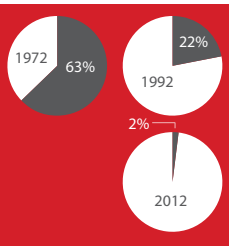
Projected number of supertalls (300 m+)

Number of megatalls (600 m+)

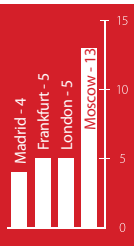
Projected number of megatalls (600 m+)

Notes:

1. We can predict 2013–2014 building completions with some accuracy due to projects now in advanced construction.
2. Totals after 2001 take into account the destruction of the World Trade Center Towers 1 and 2.



The number of 200 meter buildings using steel as the primary structural material has decreased greatly over the past 40 years, from **63%** of buildings completed during 1972 to just **2%** during 2012.



In 2009, Europe only had 19 buildings in existence over 200 meters. By the end of 2014, Europe will have 44 buildings over 200 meters. Thirteen will be in **Moscow**. No other European city will have more than five.

Led by **Torre Vitri**, Panama City was the only Central American city to build a 200m+ building in 2012. The four completed in 2012 is more than any other Central American city's current total.
