CN: Hello and welcome to City 7 news. As the endless development continues on the landscape of Dubai, more green tower blocks are expected to rise in the city in the coming years. City 7 news has learned that senior officials plan to draft new legislation in this regard. The plans to make Dubai green through the construction of high rise green structures will continue in the metropolis. Senior government officials told City 7 news today that projects to make Dubai green are a priority.

HNL: We have taken this issue very seriously. We have discussed these with a lot of the consultants and contractors, and from that step we are going to go for green buildings, and a lot of these buildings are going to come in the very near future, complying to the environmental requirements.

CN: According to Dubai municipality, new legislations in the construction of tall green buildings will be implemented amongst developers and contractors to promote sustainability.

HNL: One of the legislations to come in the very near future is a stalwart environmental requirement and green building.

CN: The cities mega projects are well known around the world and with over six of the skyscrapers and elaborate super tall buildings under construction including the tallest building in the world Burj Dubai, the Emirates achievement colossal construction is thought to be leading the way in green buildings in the region.

DS: What has happened is that there has been an enormous number of sustainable buildings, and that is quite different than the five years that occurred before hand. So the purpose of this conference is really to gather the knowledge gained in the previous five years and tell people what is going on and what's happening.

AW: Going green does not cost more money, in fact, the exact opposite is true. Although there may be a bigger initial financial investment required for sustainable technologies, the returns are far greater than the initial investment.

CN: Officials hope that the cities vision to combat climate change, developers and construction experts in the Emirates will fully embrace the idea to go green.
