100	ASE Center R5	Chongqing	China	2015	62	300	984		Office

**Footnotes:**

1. Height is measured from the level of the, lowest, significant, open-air, pedestrian entrance to the architectural top of the building, including spires, but not including antennae, signage or flag poles.

a. Has a specific site,

b. Has a developer / financier,

c. Has a full professional design team who are in the process of progressing the design beyond the conceptual stage,

d. Has a dialogue with the local planning authorities with a view to obtaining full legal permission for construction,

e. Has a full intention to progress the building to construction and completion.

Only buildings that are fully in the public domain and fulfil all the above criteria will be included in this list. Please note that due to the changing nature of early stage designs and client information restrictions, some height data is confirmed.

For a more complete overview of the CTBUH's height criteria see <http://www.ctbuh.org/criteria.htm>
